RAC comments on minimum cyclist passing distance proposal

Responding to reports that [the Government is considering a policy of minimum passing distances between motorists and cyclists](#), RAC chief engineer David Bizley said:

“We believe a proposal for a minimum passing distance between cyclists and motorists would likely be both unworkable and unenforceable. Given the dwindling numbers of full time road traffic police officers, it’s hard to see how the law would be enforced and how it could be proved that a motorist gave too little space when passing a cyclist.

"Overtaking cyclists carries risks to motorists as well as cyclists depending on road conditions and road type, so an arbitrary minimum overtaking space may not be the answer. However if evidence of a reduction in collisions exists from countries that already have a legal minimum distance then this should form part of this debate.

"Many motorists are also cyclists, and are all too aware of their responsibilities whether on two wheels or four. The question is whether Government resources would be better allocated to running road safety campaigns that educate all road users about how to use shared road space safely and responsibly.

"Where possible, we are in favour of physical segregation between cyclists and motorists in the form of cycle lanes, based on local demand for cycling and where collision risks are high, in order to best ensure cyclists' safety."

About the RAC

The RAC, an iconic UK brand, provides complete peace of mind to nearly 14 million UK private and business drivers, whatever their motoring needs. As well as its premium nationwide breakdown assistance service – with an expert branded patrol workforce attending more than two million breakdowns every year – it offers a wide range of market-leading products across insurance, legal services, vehicle inspections and service, maintenance and repair. Included in this is the first-of-its-kind nationwide Mobile Mechanics service which brings the garage to homes and workplaces.

At the forefront of new solutions for business fleets and consumers, the RAC's breakdown service is electric-ready with mobile EV charging technology and can be called on using [myRAC](#) – the all-in-one route planner, fuel finder and breakdown reporting app.
